MINERALS PROGRAM
FILE COPY

Brent Bastian visited me today about the request to modify Georgia-Pacific Corporation's Plan of Operation for the Sigurd gypsum mining. He submitted the attached letter. He stated only the southern dump site is currently being utilized. We located this site at approximately S1/2NE1/4SE1/4NE1/4 and N1/2SE1/4SE1/4NE1/4 Section 5, T. 23 S., R. 1 W., SLB&M, on the Western #17 and 18 mining claims. In his estimate, less than one acre is used. The wall board is ripped and he stated he would reclaim to our standards.

The northern dump site is approximately located in NE1/4SW1/4 Section 13, T. 22 S., R. 1 W., SLB&M, on the Gabus #2 mining claim and is about the same size. It is not in use and ready to be reclaimed.

Mr. Bastian indicated that he would still have his corporate office submit a letter. He wanted to know how to obtain proper permitting for the sites, and I told him that an approved modification to the Plan is the proper procedure. I also told him that the State of Utah would have to review the activity.

I spoke with Wayne Hedberg, Division of Oil, Gas and Mining, after Mr. Bastian left. He stated that DOGM would check on permitting for this activity.
